

TECHNICAL DOCUMENTATION

FEATURES

- Printed glass touch panel (image customizable through web application)
- 1, 2, 4 or 6 touch areas
- 2 analog/digital inputs
- Thermostat
- Built-in temperature sensor
- Backlighting of touch areas to indicate status
- · Luminosity and proximity sensor
- Total data saving on KNX bus failure
- Integrated KNX BCU
- Dimensions 81 x 81 x 31mm (it protrudes 9mm from the wall)
- Flush mount on back box
- Conformity with the CE directives (CE-mark on the back side)

Figure 1: Flat 1/2/4/6 v2

 Temperature sensor 	KNX connector	Programming LED	Programming button
5. Fixing clips	6. Inputs connector	7. Touch area	8. Luminosity and proximity sensor

Programming button: short press to set programming mode. If this button is held while plugging the device into the KNX bus, it enters the safe mode.

Programming LED: programming mode indicator (red). When the device enters the safe mode, it blinks (red) every half second. During the start-up (reset or after KNX bus failure) and if the device is not in safe mode, it emits a red flash.

Type of device	GENERAL SPECIFICATIONS

¹ Maximum consumption in the worst-case scenario (KNX Fan-In model).

INPUTS SPECIFICATIONS AND CONNECTIONS		
CONCEPT	DESCRIPTION	
Number of inputs	2	
Inputs per common	2	
Operation voltage	+3.3VDC in the common	
Operation current	1mA @ 3.3VDC (per input)	
Switching type	Dry voltage contacts between input and common	
Connection method	Pluggable screw terminal block	
Cable cross-section	0.2-1.5mm ² (IEC) / 28-14AWG (UL)	
Maximum cable length	30m	
NTC probe length	1.5m (extensible up to 30m)	
NTC accuracy (@ 25°C) ²	±0.5°C	
Temperature resolution	0.1°C	
Maximum response time	10ms	

² For Zennio temperature probes.

INTERNAL TEMPERATURE SENSOR SPECIFICATIONS		
CONCEPT	DESCRIPTION	
Measuring range	-30 +90°C	
Temperature resolution	0.1°C	
NTC accuracy (@ 25°C) 3	±0.5°C	

³ The accuracy of the NTC sensor may be reduced in case of keeping the backlight status LEDs permanently on.

INPUTS CONNECTION

Any combination of the following accessories is allowed in the inputs:

- * In case of using ZN1IO-DETEC-P sensor, its micro switch number 2 must be in Type B position.
- ** May be a Zennio temperature probe or any NTC with known resistance values at three points in the range [-55, 150°C].

INSTALLATION INSTRUCTIONS

- Fix the metal plate into a square or round flush box by using the screws from the box.
- Connect the KNX bus and the inputs terminal to the back of the device.
- Fit the device into its final position and check that the strength of the clips is enough to fix the device.

SAFETY INSTRUCTIONS AND ADDITIONAL NOTES

- Installation should only be performed by qualified professionals according to the laws and regulations applicable in each country.
- · Do not connect the mains voltage nor any other external voltage to any point of the KNX bus; it would represent a risk for the entire KNX system. The facility must have enough insulation between the mains (or auxiliary) voltage and the KNX bus or the wires of other accessories, in case of being installed.
- Keep the device away from water (condensation over the device included) and do not cover it with clothes, paper or any other material while in use.
- The WEEE logo means that this device contains electronic parts and it must be properly disposed of by following the instructions at https://www.zennio.com/en/legal/weee-regulation.
- This device contains software subject to specific licences. For details, please refer to http://zennio.com/licenses.
